

```
Sudo apt install docker.io

sudo docker pull ubuntu:bionic

sudo docker images

sudo docker run -idt --name os-project -p 8080:80 ubuntu:bionic /bin/bash

sudo docker container ls -a

sudo docker exec it os-project bash

apt update && apt upgrade

apt install sudo

sudo apt-get install iputils-ping

sudo apt-get install net-tools

sudo docker cp /home/downloads/xampp-linux-x64-7.1.32-0-installer.run os-
project:/opt/

chmod +x xampp-linux-x64-7.1.32-0-installer.run

./xampp-linux-x64-7.1.32-0-installer.run

cd lampp/

./lampp

./lampp status

ifconfig

sudo apt install nano

nano httpd-xampp.conf (This file is available in /opt/lampp/etc/extra) which has
to be corrected with three lines as in the link

Order allow,deny

Require all granted

Allow from all)

./lampp reloadapache

./lampp reloadmysql

sudo docker cp /home/downloads/FarmEasy os-project:/opt/lampp/htdocs/FarmEasy

sudo docker commit 21804891926d os-project-final
```
